Elastomers and Formulation

July 4, 2019

If elastomers have been able to resist and maintain their position for so many years in the world of polymers, they owe it to their remarkable properties, flexibility and stretching, mechanical and chemical resistance and their ability to provide acoustical or vibration responses where so many other polymeric materials cannot compete. It is also - and above all - thanks to the capacity of the formulators to make them evolve constantly in order to bring out increasingly improved properties. This richness in terms of formulation is obviously reflected in a richness of applications, although they are often unknown to the general public.

For its next technical day, the AFICEP has therefore decided to allow those who work tirelessly to improve the performance of our elastomeric materials to express themselves:

- **raw material manufacturers**, who always provide innovation
- our **distributors**, who ensure this important and essential relay of technical information on to users
- our **designers** and **formulators**, who give us their touch of know-how to transform all these material innovations into products

In short, the entire value chain of elastomer products is affected by this performance improvement approach, by raw materials and their formulation.

We are waiting for many of you to testify about these improvements and allow all of our sector to progress in terms of quality and performance thanks to you.

In July 2019, you will have the opportunity to make your voice heard. Do not hesitate to seize it, and testify with passion; the passion that characterizes our association.

Many thanks in advance to all of you from the AFICEP bureau.

For the Technical Events Committee,
Philippe DABO

Call for Papers

ELASTOMERS AND FORMULATION

LAST NAME :

FIRST NAME :

JOB TITLE :

COMPANY NAME :

ADDRESS :

.....

.....

POSTAL CODE :

CITY :

COUNTRY :

PHONE NUMBER : FAX :

EMAIL :

- Would like to present an oral communication
- Is interested in attending the congress and would like to receive the program
- Is interested in sponsoring this event

Send before

May 3, 2019
